

## Relationship of Student Outcomes to Program Educational Objectives

SSE Program Educational Objectives	SSE Program Outcomes
<p>I. Graduates from the SSE Program will successfully integrate the fundamentals of systems science and engineering with design tools/methodologies to architect innovative systems that solve complex technological problems</p>	<p><b>Outcome a:</b> an ability to apply knowledge of mathematics, science, and engineering.</p> <p><b>Outcome b:</b> an ability to design and conduct experiments, as well as to analyze and interpret data.</p> <p><b>Outcome c:</b> an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.</p> <p><b>Outcome e:</b> an ability to identify, formulate, and solve engineering problems.</p> <p><b>Outcome k:</b> an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.</p>
<p>II. Possess effective communication skills, excel in multi-disciplinary and multi-cultural teams, and have an appreciation for non-technical disciplines</p>	<p><b>Outcome d:</b> an ability to function on [in?] multi-disciplinary teams.</p> <p><b>Outcome g:</b> an ability to communicate effectively.</p> <p><b>Outcome h:</b> the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.</p> <p><b>Outcome j:</b> knowledge of contemporary issues.</p>
<p>III. Be prepared to launch their careers or pursue graduate studies in systems science and engineering or their chosen field; and engage in life-long learning</p>	<p><b>Outcome i:</b> recognition of the need for, and an ability to engage in, life-long learning.</p> <p><b>Outcome k:</b> an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.</p>
<p>IV. Be recognized in their chosen fields for their leadership, integrity, understanding, and sensitivity to global societal issues</p>	<p><b>Outcome f:</b> an understanding of professional and ethical responsibility.</p> <p><b>Outcome h:</b> the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.</p> <p><b>Outcome j:</b> knowledge of contemporary technical issues.</p>
