## Relationship of Student Outcomes to Program Educational Objectives

EE Program Educational Objectives	EE Student Outcomes
I. Graduates from the EE Program will successfully integrate the fundamentals of electrical engineering and design/realization practices to develop innovative and practical solutions to complex technological problems;	<ul> <li>Outcome a: an ability to apply knowledge of mathematics, science, and engineering.</li> <li>Outcome b: an ability to design and conduct experiments, as well as to analyze and interpret data.</li> <li>Outcome c: an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability.</li> <li>Outcome e: an ability to identify, formulate, and solve engineering problems.</li> <li>Outcome k: an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.</li> </ul>
II. Possess effective communication skills, excel in multidisciplinary and multi-cultural teams, and have an appreciation for non-technical disciplines;	<ul> <li>Outcome d: an ability to function on multidisciplinary teams.</li> <li>Outcome g: an ability to communicate effectively.</li> <li>Outcome h: the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.</li> <li>Outcome j: knowledge of contemporary issues.</li> </ul>
III. Be prepared to launch their careers or pursue graduate studies in electrical engineering or their chosen field; and engage in lifelong learning;	<ul> <li>Outcome i: recognition of the need for, and an ability to engage in lifelong learning.</li> <li>Outcome k: an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.</li> </ul>
IV. Be recognized in their chosen fields for their leadership, integrity, understanding and sensitivity to global societal issues.	<ul> <li>Outcome f: an understanding of professional and ethical responsibility.</li> <li>Outcome h: the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context.</li> <li>Outcome j: knowledge of contemporary technical issues.</li> </ul>
